

Working platforms with sliding extensions

Lifts for easy access for operators reaching parts of a machine at a nuclear plant in England. The two lifts are placed on each side of the machine and have sliding extensions on the platform for extended reach.

For safety reasons the lifts can not be lowered before the extensions are retracted

Interlocked gates all around the lifts secures the operators.

The lift is also provided with battery back-up if power failure

The lift capacity is 500 kg and the stroke 1800 mm
